The Institute of Health
Prescribing for Practice Non-Medical Prescribing (V150)
Course Guide

2018-19
January
About this guide

This is your course guide. It provides the basic but fundamental information about your course of study. This guide is yours for the duration of the course, we don't re-issue it annually and if any information contained within were to change then we will write to you to explain so.

In particular, if any important aspects relating to your modules were to change then we will inform you in accordance with the Code of Practice for the Management of Changes to Modules and Courses. The teaching and support teams which you will get to know over time will refer to this guide – it will be useful to you and we advise you to make good use of it throughout your studies.

The Course Guide should be read in conjunction with the more general sources of information which relate to all students at the University. The Student Handbook is a very detailed reference point for all issues relating to your studies which aren't specific to just your particular course. You might also want to refer to the Student Charter; the University's Policies and Regulations and the University Assessment Handbook documents which will provide you with all of the information that we think you will need for your period of study here.

If you need additional information, or you simply want to discuss elements of any of these documents or other aspects of your course, find that there is something you need to know, please contact your Faculty Student Services:

Faculty Student Services

We can help with the administration and organisation of your time at University – from enrolment and module registration, tuition fee enquiries, attendance support, course management and lifecycle queries, extenuating circumstances, leave of absence, transfers and changes, assignment submission, SAMs appointments, assessment and result queries, right through to Graduation.

You can also come and talk to us for impartial advice and support if things are starting to go wrong and you’re not sure who else to talk to. The main thing to remember is that you are not alone. We see large numbers of students over the course of a year on a variety of issues, so please don’t be afraid to approach us.

We are here to ensure that your transition into Higher Education is as smooth as possible. Normal office opening hours are Monday-Friday 08:45-17:00.

You can contact us through the e:vision help desk, by phone or in person or by e-mail:

Welcome from the Course Leader

On behalf of the teaching and support teams from Prescribing for Practice Non-Medical Prescribing (V150) course, I would like to extend to you a very warm welcome to the University of Wolverhampton, and in
particular your campus.

My name is Jayne Murphy and I am the course leader for your Prescribing for Practice Non-Medical Prescribing (V150) course and alongside your personal tutor, will be your main point of contact over the duration of your studies. My contact details are below – please don’t hesitate to get in touch if you need any support or guidance.

The successes which you will achieve whilst at the University are based upon a partnership between the expertise and support from the staff here and the effort you put into learning. We welcome students who are eager to think for themselves, to take control of their own learning and who are ready to get involved in developing the skills required in a highly competitive job market. Make the most of the wide range of opportunities available to you.

Studying at University can be difficult, and for many of you the transition into University life will be challenging. However we will support you throughout your course, particularly whilst you develop into an independent learner over the course of your first year with us.

We believe it is important that you are encouraged to make your own contribution to the effective operation and development of your chosen course. We hope that you might consider acting as a Course Representative during some of your time with us to help the University continue to improve your experience.

I would like to wish you every success with your studies. We look forward to working with you and hope that you enjoy your time with us.

Jayne Murphy

Educational Aims of the Course

The award aims to develop and integrate the underpinning theory and practice to prepare specialist practitioners to prescribe safely appropriately and cost effectively from the Nurse Prescribers formulary for Community Practitioners.

Specific Professional Outcomes are

1. Work with patients and clients as partners in treatment to make accurate assessment, diagnosis and prescribing decisions.
2. Synthesise information to prescribe safely, appropriately and cost effectively from the appropriate prescribing formulary.
3. Critically appraise and justify prescribing decisions taking into consideration health policies, public health and prescribing practices.
4. Critically appraise the roles of other key stakeholders in prescribing practice
5. Synthesise complex information to apply knowledge of medications and treatments in prescribing practice and professional responsibility in relation to prescribing.

What makes this programme distinctive?

Students accessing this award will be from a wide range of areas within the West Midlands and across many
health care specialisms in both acute, community, private and other statutory organisations. Networking and interprofessional education for students is encouraged and considered to be a strength of the course as evidenced in previous student course evaluations. Community Practitioners are expected to continue with professional development opportunities related to their practice area. We are particularly proud of our prescribing practice expertise underpinning the award.

PSRB
Employability in the Curriculum

This award will further add to the competence, confidence and employability of practitioners at a more senior level.

Teaching, Learning and Assessment

A range of learning activities will be utilised to support the achievement of the course learning outcomes. These will include interactive lectures and presentations, CANVAS, seminars, workshops, practice related activities, group and individual tutorials, clinical skills development within the practice setting, enquiry based learning, self directed study and reflection.

Reference Points

Standards of proficiency for nurse and midwife prescribers (NMC 2006) and relevant updates of NMC circulars;

The Code: Professional Standards of Practice and Behaviour for Nurses and Midwives (NMC 2015)

The programme has been benchmarked against the following:-

Blended Learning Targets

Graduate Attributes University of Wolverhampton.

Academic Regulations Exemptions

None

Support with your studies

University Learning Centres are the key source of academic information for students providing access to:

- Physical library resources (books, journal, DVDs etc.)
- Study areas to allow students to study in the environment that suits them best: Social areas, quiet and silent areas.
- A wide range of online information sources, including eBooks, e-journals and subject databases
- Academic skills support via the Skills for Learning programme
- Students on campus can attend workshops or ask for one-to-one help on a range of skills such as academic writing and referencing.
- Dedicated Subject Pages to enable you to explore key online information sources that are recommended for their studies.
Physical access to local libraries both in UK and overseas via SCONUL and WorldCat agreements

We also strongly advise you to download to "MyWLV" student app. MyWLV is a single point of personalised access to the variety of systems the University offers. This includes pulling through relevant information (e.g. deadlines, timetables) and linking to underlying systems.

Leave of Absence:

The University allows breaks in learning of up to two years and there is a process for applying for a leave of absence, which can be accessed through your e:Vision account. Initially you will need to apply for the leave of absence, which could be for medical, parental or personal reasons. A short-term absence, such as annual leave, must not be recorded as a break. The course leader will consider, and where appropriate agree, the leave of absence application. A return date will be identified and agreed for a suitable point in the programme. Additional course fees may be incurred as a result of a leave of absence and you are advised to discuss this with the Faculty Student Services team prior to application.

Course Specific Support

Students will be supported throughout the course by:-

The course award leader

The designated module leaders and teachers will provide academic support for the student on the module

Each student will have a Mentor for Prescribing Practice (MPP) and Prescribing Lead to support. In addition to support from the academic team, the campus-based Learning Centres which provide special support, the University provides a range of support for you to develop the skills required for successful academic study. These include:

- Infobites
- Academic Writing Skills
- Referencing
- EndNote
- PebblePAD
- IT Services self-help guides
- Study Skills
- Skills for learning
- Assist
- The Student Enabling Centre
- The School provides additional support
- FEHW Student Advisors

Within the induction day there is a dedicated face to face session on study skills, referencing and details on how to contact and access the above support services. Students will also be informed about the range of electronic study skills support available to them on a regular basis both within the induction period and in the delivery of each module. Within pre course materials students are directed to a range of resources in relation to study skills focusing on activities such as how to write an assignment, making effective lecture notes etc.

Contact Hours

In higher education, the term 'contact hours' is used very broadly, to refer to the amount of time that you spend learning in contact with teaching or associated staff, when studying for a particular course.

This time provides you with the support in developing your subject knowledge and skills, and opportunities to develop and reflect on your own, independent learning. Contact time can take a wide variety of forms depending on your subject, as well as where and how you are studying. Some of the most common examples
are:

- lectures
- seminars
- tutorials
- project supervisions
- demonstrations
- practical classes and workshops
- supervised time in a studio/workshop
- fieldwork
- external visits
- work-based learning (including placements)
- scheduled virtual interaction with tutor such as online, Skype, telephone

In UK higher education, you as the student take primary responsibility for your own learning. In this context, contact time with teaching and associated staff is there to help shape and guide your studies. It may be used to introduce new ideas and equip you with certain knowledge or skills, demonstrate practical skills for you to practise independently, offer guidance on project work, or to provide personalised feedback.

Alongside contact time, private or independent study is therefore very significant. This is the time that you spend learning without direct supervision from, or contact with, a member of staff. It might include background reading, preparation for seminars or tutorials, follow-up work, wider practice, the completion of assignments, revision, and so on.

50 Day Engagement:

You will be withdrawn from the University if you fail to engage with the academic requirements of your course of study, within 50 days of the course start date, following repeated and reasonable attempts by the University to contact you.

Course Specific Health and Safety Issues

As there are clinical hours linked to your qualification you should adhere to your Trust Health and Safety policy
